**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 and 35 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are drawn to a mathematical algorithm. A claim needs to have a transformation of data or reliance on technology to be statutory. The current claims would overcome this rejection is amended to recite that the data was provided by a sensor and the calculating was done with a processor. Alternatively, applicant could recite that each of the steps are computer implemented.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by the Akerstedt et al abstract entitled "The three performance model of alertness.... Akerstedt et al teaches a computer implemented method, system, and program to predict performance of tasks, or cognitive performance, cognitive throughput, which is at least a measure of cognitive performance, where the cognitive throughput is determined from a model of circadian rhythm, C, and a parameter H, which is determined from sleep/wake data and represents a cognitive level.

Claim 35 defines over the art in that none of the art determines a cognitive performance from both the sleep/wake function and circadian rhythm, using the claimed formulas.
